PREFACE

This is the second edition of Scarborough Public Library Board's Framework for the Development of Public Library Service in the City of Scarborough, completed some six years after the first edition. Since I have been a Board member during the same period of time, my interest went backward in time, as well as forward, as I studied the revisions. What struck me most was the amount the Board had accomplished since 1978: its vision at that time was clear and realistic, and its policies were, on the whole, wise and attainable. I am certain that this second edition of the five-year Framework document will likewise be realizable, and sensitive to Scarborough residents' educational, informational, recreational and leisure needs; and in addition will be sharply aware of the profound technological changes affecting our society up to 1993.

This edition of our Framework was largely compiled by Vicki Casey who spent much time researching other Boards' frameworks, interviewing staff and receiving input from our Library Board. The essence of each Department Head's Into the Eighties report was included, as were the best of the old Framework policies, sharpened-up and modernized.

An important additional component of any Framework for future library services are the ideas generated by senior staff. In Scarborough, our Director and Deputy Director constantly seek to guide the Scarborough Public Library Board into being responsive to the changing needs of the citizens of the City of Scarborough, fiscally circumspect, and technologically updated.

The Library Board endorses this second edition of the Framework, and will seek to obtain the kind of funding, staff and facilities necessary to fulfill its vision.

Flora McKinlay
Chairman

INTRODUCTION

INTRODUCTION

Until 1978, public library service in Scarborough evolved with the aid of various planning reports and studies which dealt with particular geographical areas and specific services. With the publication of the Framework for the Development of Library Service in the Borough of Scarborough, in 1978, a general policy and planning document existed to give direction for the development of library services and facilities.

In 1983, a revision of the original Framework document was initiated to ensure that policy coincided with recent demographic, social and planning changes within the City of Scarborough.

The revision began with a review and consolidation of the Into the Eighties report prepared by Division Heads and Co-ordinators. Small staff meetings were held throughout the system to receive comments and suggestions on recommended future direction. The resulting report entitled, Into the Eighties: a summary

and updating of reports of the Co-ordinators and Division Heads as discussed with the Management Committee was presented and received by the Chairmen's Committee of the Library Board in May, 1983.

Ideas presented in this report, and comments from the Chairmen's Committee members, developed the Principles, Goals and Objectives of the Framework. This process included discussions with staff; examination of goals, objectives and policy documents of library systems throughout North America; an examination of the literature on library planning; and a study of internal planning and policy documents.

Both library and City statistics were examined and compiled. 1981 census population figures were obtained from Statistics Canada with the valuable assistance of a statistician at the Ontario Ministry of Treasury and Economics. Once again staff were consulted on the revision of planning criteria and future development of the system.

Past and present patterns of library usage and development were analysed to determine current and future standards.

The document was organized to indicate the recommended development of library service, to highlight the basic decisions which influenced the Framework design, to give an historical perspective of the development of the library system, and to state the overall aim, principles, goals, objectives and planning criteria which will guide the development of library service.

The aim of this second edition of the Framework is to guide the development of an improved public library service for all the citizens of the City of Scarborough.

RECOMMENDED DEVELOPMENT

RECOMMENDED DEVELOPMENT

The following chart indicates the library facilities considered necessary to give the residents of Scarborough equal access to the services of the public library system. These facilities are expected to be developed and redeveloped between the years 1985 and 1993. This development is based on the fundamental concerns, planning criteria, goals and objectives, which are embodied in this document.

The map distinguishes the geographical areas of the three districts and the existing and proposed library buildings which will serve the planned population of the City of Scarborough.

DEVELOPMENT AND REDEVELOPMENT OF LIBRARY FACILITIES 1985 - 1993

Name of Branch	Type	District	Location	Facility

FUNDAMENTAL ELEMENTS OF THE FRAMEWORK

FOR THE DEVELOPMENT OF LIBRARY SERVICE

FUNDAMENTAL ELEMENTS OF THE FRAMEWORK FOR THE DEVELOPMENT OF LIBRARY SERVICE

1. The model used for the development of the library system called for a four-tiered service network founded on the Metropolitan Toronto Reference Library followed by the Central Library, then the District Library and, finally, the Community, Neighbourhood and bookmobile libraries.

2. To give adequate space to resources and services and necessary support to the public services for an urban population, it is necessary to aim at an aggregate of space equal to .05 square metres per capita.

3. To make adequate resources available to the population of the City of Scarborough, it is necessary to provide three items per capita for a comprehensive public library service.

4. To give the residents of Scarborough equal access to public library services, it is necessary to provide local library service within a 1.5 km. radius of their residence.

5. The Central Library will function as one main library facility within the City Centre and serve the entire City of Scarborough.

6. The City of Scarborough is divided into three geographical districts of approximate equal population for the efficient and equal delivery of library service for the planned development of the City of Scarborough, and each district has one district library and several branch libraries.

7. The boundaries of the Southeastern District are Bellamy Road on the west, Highway #401 and the Hydro line corridor in the north, the eastern boundary of the City of Scarborough, and Lake Ontario in the south.

The Southeastern District comprises the following facilities:

i) Cedarbrae District Library (existing)
ii) Centenary Neighbourhood branch library (future)
iii) Guildwood Neighbourhood branch library (existing)
iv) Highland Creek Neighbourhood branch library (existing)
v) Morningside Neighbourhood branch library (existing)
vi) Port Union Neighbourhood branch library (existing)

8. The boundaries of the Southwestern District are Victoria Park Avenue in the west, Highway #401 in the north, Bellamy Road in the east, and Lake Ontario to the south.

The Southwestern District comprises the following facilities:

i) Albert Campbell District Library (existing)
ii) Bendale Neighbourhood branch library (existing)
iii) Cliffcrest Neighbourhood branch library (existing)
iv) Eglinton Square Neighbourhood branch library (existing)
v) Eglinton/Kennedy Neighbourhood branch library (future)
vi) Maryvale Neighbourhood branch library (existing)
vii) McGregor Park Neighbourhood branch library (existing)
viii) Taylor Memorial Neighbourhood branch library (existing)
ix) Oakridge Neighbourhood branch library - small branch (future)

9. The boundaries of the Northern District are Victoria Park Avenue in the west, Steeles Avenue in the north, the eastern boundary of the City of Scarborough, and Highway #401 and the Hydro line corridor in the south.

The Northern District comprises the following facilities:

i) Northern District Library (future)
ii) Agincourt Neighbourhood branch library (existing)
iii) Bridlewood Neighbourhood branch library (existing)
iv) Malvern Community branch library (existing)
v) Milliken Neighbourhood branch library (future)
vi) Steeles Neighbourhood branch library (future)
vii) Woodside Square Neighbourhood branch library (existing)

HISTORICAL BACKGROUND

CHRONOLOGICAL EXPANSION OF THE SYSTEM

1955 Public Library By-law 6509 passed by the Council of the Township of Scarborough united Agincourt, Highland Creek and Scarboro (sic) library associations, Scarboro Library Association operated the St. Andrews Branch Library, by the newly established Public Library Board. The administrative offices of the Library Board were located in a GECO building, Eglinton Avenue and Birchmount Road.

1956 Golden Mile Branch opened in a GECO building to the west of the Library Board's administrative offices. Bookmobile service commenced.

1960 McGregor Park Neighbourhood Branch Library opened.

1961 Bendale Neighbourhood Branch Library opened (St. Andrews Branch Library closed).

1962 Florence Taylor Memorial Neighbourhood Branch Library opened.

1964 Relocation of Highland Creek Neighbourhood Branch Library to present quarters. Administrative and support services relocated to the present Administration/ Support Services building.

1965 Relocation of Golden Mile Branch to Eglinton Square Neighbourhood Branch Library.

1966 Cedarbrae District Library opened.

1967 Relocation of Agincourt Neighbourhood Branch Library to the Agincourt Mall.

1968 Morningside Neighbourhood Branch Library opened. Completion of addition to Administration/Support Services building.

1971 Albert Campbell District Library opened.

1972 Cliffcrest Neighbourhood Branch Library opened.

1974 Guildwood Neighbourhood Branch Library opened.

1975 Port Union Neighbourhood Branch Library opened.

1976 Bridlewood Neighbourhood Branch Library opened.

1977 Woodside Square Neighbourhood Branch Library opened.

1979 Morningside Neighbourhood Branch Library relocated in Morningside Mall.

1981 Woodside Square Neighbourhood Branch Library relocated in Woodside Square Mall.

1982 Maryvale Neighbourhood Branch Library opened.
Agincourt Neighbourhood Branch Library relocated in Agincourt Mall.

1982 Malvern Community Branch Library opened in the Malvern Community Recreation Centre and Library.

1982 First location of the system-wide computer-assisted circulation control and enquiry system was implemented at Malvern Community Branch Library.

1983 Cedarbrae District Library extension and partial renovation.

1983 Eglinton Square Neighbourhood Branch Library relocated in Eglinton Square Mall.

1984 Port Union Neighbourhood Branch Library redeveloped and relocated in the Port Union Community Recreation Centre and Public Library.

1985 Florence Taylor Memorial Neighbourhood Branch Library redeveloped.

HISTORICAL BACKGROUND

The Scarborough Public Library Board was established August 18th, 1955, in accordance with the Public Libraries Act, when the Scarborough Township Council passed the Public Library By-Law. Three library associations with subscribing memberships - Agincourt, Highland Creek and Scarboro (sic) - were united under the newly-formed Public Library Board of the Township of Scarborough.
1956 saw the opening of Scarborough Public Library Board's Golden Mile Branch and the establishment of a Bookmobile service. Over the next three years, the Board relied heavily on this service to distribute books throughout the Township. For the first time in history, Scarborough's residents had access to free library services on a township-wide basis.

From its modest beginning of three small branches and a bookmobile service, serving a total population of 110,286 in 1955, the library system grew to double its size within the next ten years. Between 1958 and 1965, Scarborough established three new

branches and was now serving a population of 260,746. The system struggled to meet the rapidly growing demand for library resources as annual circulation grew from 13,586 items in 1955, to 1,672,010 items by 1965.

To keep pace with the Borough's growth and its increasing demand for additional library resources, Scarborough Public Library Board once again doubled in physical size during the second decade of its existence, 1965-1975. Six new branches, including two district facilities; one at Cedarbrae (1966) and one at Albert Campbell (1971), each with extensive collections; were added bringing the total number of branches to twelve which, by 1975, served over 370,000 people. Since 1975, four new branches have been added serving a population of 440,000 in 1983.

While public pressure for expansion and rapid physical growth accurately depict the give-and-take, stimulus/response character of the development of the Scarborough Public Library Board in its first two decades, it was not indicative of the dramatic expansion in services that were occurring. Between 1965 and 1983, information questions handled by staff soared from 15,579 to 1,032,301. Circulation climbed

during the same period from approximately 1.6 million to 3,993,489. The public library had become a major focal point in the 'knowledge explosion' and improved services were required to meet new, more complex demands.

The library system's response to these demands took several forms. Firstly, as early as 1967, the need for speedier, more efficient transfer of information was recognized and the teletype system was installed. This provided more direct access to the collections in the branches of the Board as well as resources in several educational facilities in the Borough and collections in six other public library systems throughout the Metropolitan Toronto region. Secondly, two district-sized installations capable of eventually serving up to 200,000 persons each were added, expanding the collection from 194,941 to 993,831 items but, as well, made a concentrated effort to add materials in languages other than English and French.

The decentralized audiovisual services became an increasingly popular component of library service, especially video, record and cassette collections. The library system utilized these resources to involve the community in a variety of programmes, displays and exhibits, film showings, and discussion groups. By 1983, these programmes totalled 4,795 for the year with 110,109 people in attendance.

The children's and teens' services and programming have grown in the past few years. The services for the disabled, aged and infirm have been expanded with the decentralization to the branches of home deliveries and institutional deposits. Efforts have been made to develop services for disadvantaged members of the community within the branches. To accommodate these varied tasks, staff has increased from twenty-two in 1956 to two hundred and forty-one in 1983.

Technology made its mark on the Scarborough Public Library system in the mid-1970's. The addition of computer-assisted systems increased the efficiency of the finance, cataloguing and ordering processes. The Computer Output Microform, "COM CAT", has become the accepted means for the public and staff retrieving library materials. Access to information through online searching has become an integrated component of Cedarbrae District Library's reference service since its introduction in 1977. Increasingly, staff in other branches are becoming aware of its potential and are utilizing the service more effectively. Conversion to a computer-assisted circulation control and enquiry system is nearing completion and will further improve record keeping and communications between branches.

The Scarborough Public Library Board has been in the forefront of local public libraries by experimenting with other computer resources such as Telidon and microcomputers.

As the eighties progress, Scarborough Public Library Board will continue to respond to changes in the community with the plan for a Northern District Library and a Central Library as part of the new City Centre development. Other new branches will be built and services modified or developed as population and demand indicate.

The Scarborough Public Library Board will continue its commitment to choose wisely and prudently among competing demands in order to incorporate the best combination of needed services to Scarborough's citizens.

AIM, PRINCIPLES AND GENERAL GOALS

AIM

To provide, as set forth in The Public Libraries Act, Revised Statutes of Ontario, 1980, Chapter 414, and, in co-operation with other library and information agencies, a public library service which is as comprehensive, economic, and as efficient as possible.

PRINCIPLES

1. To provide a comprehensive user-oriented public library service which responds to and anticipates the needs of the residents of the City of Scarborough.

2. To provide access to information, reflecting all available points of view, in order to support freedom of information.

3. To provide qualified and trained staff to deliver public library service.

4. To provide physical facilities capable of housing and supporting public library service.

5. To provide opportunity for equal access to library resources, for residents of the City of Scarborough, through any public service point.

6. To provide a multicultural service integrated within the overall public library service.

7. To create public awareness of public library services.

8. To co-operate with other libraries and agencies in the delivery of public library services.

9. To ensure confidentiality of the circulation records of all users of the library system.

10. To evaluate services on a regular basis to ensure that they are complementary to the community, responsive to local needs and of sustained interest.

GENERAL GOALS

1. To provide a full range of resources for self-development which serve to complement formal learning experiences and encourage the pursuit of extended, independent study.

2. To provide a timely, efficient, information service ensuring well-informed staff and citizens regarding issues of interest and concern.

3. To lend appreciable support to the cultural life of the people of the City of Scarborough by providing resources that increase the opportunity for cultural participation and enrich the quality of these experiences.

4. To promote a greater enjoyment of leisure-time activities through the use of library materials, programmes and information.

5. To emphasize an increased use of library materials by users of all ages and educational backgrounds as the overall objective of all staff activities and programmes.

6. To promote reading as a pleasurable experience for users of all ages and educational backgrounds.

PLANNING CRITERIA

PLANNING CRITERIA

The model for the development of public library service for the City of Scarborough is based on a three-level system which responds to local needs and demands. This idea accommodates co-operation between the library systems in the Metropolitan Toronto area and the provision of specialized reference and research facilities from the Metropolitan Toronto Reference Library.

First Level: Central Library

This level provides a resource facility for the whole of the City of Scarborough. The service provides support for the rest of the Scarborough library system and serves the information, research and leisure needs of those who live, work and attend school in Scarborough. It is the centre of an information and referral network for the entire community. It is administered as a separate unit within the system and is located within the Scarborough City Centre.

Second Level: District Libraries

The district facility acts as a service outlet for its immediate location, a reference and information centre for its geographical district providing access to more specialized information services, a programming facility, and a source of support (staff and materials) for each of the neighbourhood branches within its district. Home and institutional services for the disabled, aged and infirm are provided and organized at this level. This level provides an administrative facility within each defined district. The administrative functions include maintaining a communication link between the administrative centre and the network of facilities within the district. This includes assisting in staff training, interpreting procedures and policies to staff, and supervising the co-ordination of materials and services within the district.

Third Level: Branch Libraries and Bookmobile Services

This level provides a number of strategically located service outlets and bookmobile stops intended to bring a full range of services within easy reach of every community resident. In addition to maintaining its own collection of resources, each service outlet acts as an access point to the system-wide collection of resources. Home and institutional services for the disabled, aged and infirm will be part of the service of branches. The exception is Talking Books which will be administered centrally as part of mobile services.

CENTRAL LIBRARY SERVICES - FIRST LEVEL

Central Library Criteria

a) The Central Library will directly serve the population of the entire area of the City of Scarborough.

b) The Central Library will provide a centralized collection of materials which satisfy the reference and research needs of those who live, work and study in the City of Scarborough.

c) The emphasis of the collection will be primarily non-fiction and will serve as a support resource for district library collections.

d) Central Library collections will be approximately twenty to twenty-five (20%-25%) percent of total systems collections.

e) Additions to Central Library collections will be according to defined collections development policy based on usage, demand and future needs.

f) The expected usage of Central Library materials would be two to three items per capita circulation, and one information question per capita per year.

g) The Central Library will develop services to meet the needs of specialized groups in the community.

h) The Central Library, to provide adequate collections and services, will require 9,500 square metres.

Location of Central Facility

The Central Library, to provide the most convenient access possible to the community as a whole, should be located in the City Centre area.

DISTRICT LIBRARY SERVICES - SECOND LEVEL

District Library Criteria

a) Provide a range of resources to satisfy cultural, leisure and intermediate informational needs of district residents.

b) Develop liaison with the community to assess needs accurately, promote the widest possible use of resources, and provide support materials and programmes.

c) The district facility will serve less than 200,000 people in a geographical area of approximately forty square kilometres or less.

d) The district facility will provide a collection of materials to satisfy both continuing local use, district-wide reference and intermediate research needs.

e) The collection of materials in the district facility will be composed of approximately fifty to fifty-five percent (50%-55%) non-fiction including reference works and periodicals, twenty to twenty-five percent (20%-25%) browsing and fiction including paperbacks and multicultural materials, and twenty to twenty-five percent (20%-25%) juvenile.

f) Additions to district facility collections will be determined by population growth or decline, previous use, and anticipated need. A guideline figure for additions would be twenty to thirty-five percent (20%-35%) of materials added to entire district.

g) Withdrawals should be carried out at the rate of five to eight percent (5%-8%) per year.

h) The expected annual circulation of materials from district facilities should approximate five items per capita for district served with 150,000 to 250,000 information questions.

i) The district facility is required to be at least 2,500 square metres gross area and to be on not more than two levels.

Location of District Facilities

The location of the district facility should be chosen to fulfill two basic objectives; ease of access and sustained volume of use. Accordingly, the facility should be located where large numbers of people congregate on a regular basis, i.e. near a major shopping centre and in an area of heavy population density. This location should be close to or on a major traffic artery to ensure direct access by both private and public transportation and with adequate parking facilities.

BRANCH LIBRARIES AND BOOKMOBILE SERVICES - THIRD LEVEL

COMMUNITY BRANCH LIBRARY SERVICES

The purpose of community branches is to provide residents, in communities with natural or man-made barriers, with convenient access to a full range of library resources. The basic size of a community branch is 1,000 to 1,400 square metres.

NEIGHBOURHOOD BRANCH LIBRARY SERVICES

The purpose of neighbourhood branches and bookmobile stops is to provide community residents with convenient access points to resources. As communities vary in size and population density, the amount of space required to provide community services should vary proportionately. It is suggested that, to achieve this degree of variation, different sizes of branch libraries are required. These basic sizes for the neighbourhood branch libraries are 400 to 700 and 150 to 250 square metres. The size for a particular location is entirely dependent on the projected population of communities to be served and the anticipated volume of use.

Community and Neighbourhood Criteria

a) General

i) Provide a range of resources to satisfy general informational, cultural and leisure-time needs of community residents.

ii) Develop liaison with the community to assess needs accurately, promote the widest possible use of resources, and provide materials and programmes to support local activities and projects. Extent of programming will be determined by need and availability of space.

iii) Additions to collections in each location will be determined by population growth or decline, previous use and anticipated need. Guideline figures for each size branch are suggested below.

iv) Withdrawals should be carried out at the rate of five to eight percent (5%-8%) per year.

v) The expected annual circulation from a neighbourhood facility should approximate five to eight items per capita, based on current population figures for communities served.

vi) To achieve their expected volume of use, branches and mobile services should be located where people congregate. The best location, based on past experience, continues to be in or near a shopping centre. For mobile services, sites in high density areas with nearby highrises are most effective. All branch sites should be on well-travelled roads and easily accessible by either public or private transportation.

b) Community Branch, 1,000 to 1,400 square metres

i) Provide services for up to 50,000 people in specially designated areas where natural or man-made barriers create a large separate community.

ii) Total size of collection to range between 50,000 and 70,000 items composed of fifty percent (50%) non-fiction and reference books, twenty-five percent (25%) fiction and browsing, twenty-five percent (25%) children's books. This composition may change in relation to actual need and use.

iii) Additions should be fifteen to twenty percent (15%-20%) of the total additions to the district per year according to use of the collection.

iv) The branch should be situated at least three kilometres from other service outlets and is expected to draw its users from only the particular community within which it is situated.

c) Neighbourhood Branch, 400 to 700 square metres

i) Provides services for 10,000 to 30,000 people.

ii) Total size of the collection to range between 30,000 and 50,000 items composed of approximately thirty-five percent (35%) non-fiction, thirty-five percent (35%) fiction and browsing, and thirty percent (30%) children's materials. The ratio of composition of the collections may change in response to local conditions of use.

iii) The branch should be situated at least two kilometres from other service outlets.

iv) Level of service as reflected by hours and staffing are determined by local demand.

d) Small Neighbourhood Branch, 150 to 250 square metres

i) Provide services for up to 10,000 people in specially designated areas where natural or man-made barriers create a small separated community.

ii) Total size of collection approximately 10,000 to 20,000 items. Composition of collection to be determined by specific service objectives underlying the use of this size branch.

iii) Additions should be up to five percent (5%) of the total additions to the district per year. This figure juxtaposed to the withdrawal rate of five percent (5%) per year indicates the maintenance of a collection of constant size with sufficient turnover of materials to ensure continued responsiveness.

iv) Specific location to be determined by underlying objectives for bringing this size branch into service. This type of facility might be housed within an apartment block, a school, a community centre, a storefront or subway station.

e) Bookmobile Services

Mobile services provide access to resources for users who are unable to use established service because they live too far from an outlet.

i) A mobile unit (bookmobile) carries a stock of 4,500 items with strong emphasis on children's materials.

ii) The composition of the mobile unit collection should be approximately twenty percent (20%) non-fiction including periodicals, twenty percent (20%) fiction, and sixty percent (60%) children's materials.

Collection and Implementation: Planning and Design Formulae

1. **Stock of Materials**

The system-wide stock of materials will be developed at the rate of three (3) items per capita, based on current population figures for the City of Scarborough. Materials are to be allocated to the Central Library on the basis of use and demand, and should be approximately twenty to twenty-five percent (20%-25%) of the system-wide collection.

Materials are to be allocated to each district on the basis of its respective population figures and patterns of usage, with approximately twenty to thirty-five percent (20%-35%) of these materials to be allocated directly to the district facility. The exact size of the district facility's collection is to be determined by previous use and present need in that location.

2. **Use of Materials**

The anticipated annual rate of use will result in a circulation of ten (10) items per capita for the total Scarborough population.

3. Physical Facilities

The space requirements of the library system will be calculated at the rate of .05 square metres per capita. (See Table in Appendix for projections.) Space will be allocated to Public Services at the rate of eighty percent (80%) of total space requirements and to Administrative Services at the rate of twenty percent (20%) of total space requirements. Space for Administrative Services can be broken down as follows:

- 10% Centralized Administrative Services including administrative offices and technical services

- 4% District Administration (offices for District Librarian, Assistant District Librarian, Branch Liaison Librarian, and the Administrative Assistant)

- 6% District Administrative Services (e.g. work areas)

COLLECTION SUPPORT SERVICES

The Collection Support Service provides the foundation for public service through the acquisition of materials and the creation of data records required for their management, retrieval and use. Activities of the area include acquisition, cataloguing, processing, interlibrary loan, circulation control, and distribution of materials. Space should be sufficient to allow the most efficient processing of materials.

Collection Support Services Criteria

a) The location of the facility will be central within the City of Scarborough to provide efficiency in the distribution of materials and convenient access to staff to and from branches.

b) Space should be flexible to adapt to new technology as it is incorporated into the Division.

c) The facility should allow for increases in the amount of materials processed and for the addition of new services and formats.

d) Space will be made available for storage of retrospective or little used materials from branches.

e) Space will be optimized through the use of compact shelving.

f) The collection support services facility requires a gross floor area of 1,200 square metres with the following space allocation according to function:

Cataloguing	350 square metres
Acquisitions and Interlibrary Loan	200 square metres
Circulation Control	150 square metres
System Collection and New Branch Storage	150 square metres
Collection Distribution and Withdrawals	100 square metres
Processing	250 square metres
TOTAL	1,200 square metres

GOALS AND OBJECTIVES

A SERVICE

Goals:

1) To deliver a variety of public library services for citizens of all ages in accordance with the community needs for education, information, culture and leisure.

2) To co-operate with other public library systems, community organizations and educational institutions in a network to make available the broadest possible variety of services.

3) To provide services which reflect and respond to social and economic trends in the community.

4) To promote, actively, an increased awareness of public library services.

Objectives:

1) To deliver a variety of services for adults, children and teens by means of programmes, print, audiovisual and computerized resources to provide:

   i) support for formal or self-directed learning.

   ii) opportunity for an efficient, up-to-date information service.

   iii) opportunity for the enrichment of cultural life.

   iv) opportunity for increased enjoyment of leisure time.

2) To provide a community information service relevant to the needs of Scarborough citizens and complementary to other community information services.

3) To develop, as a fully integrated component of library service, programmes which respond to a significant need or interest in the community.

4) To offer, for all age groups, access to computer resources.

5) To identify groups with specialized information needs and to develop services for these groups.

6) To provide guidance in the choice and use of library materials to both individuals and groups.

7) To provide a variety of multicultural services for Scarborough citizens of backgrounds other than English or French.

8) To participate in co-operative information services and networks with other libraries and to share resources through the interlibrary loan network.

9) To develop a working liaison with educational institutions within the City of Scarborough in order to provide complementary support for formal learning.

10) To develop and maintain liaison with community organizations servicing adults, children and teens in order to fill their informational and programming needs and to utilize their human and material resources.

11) To deliver services to Scarborough residents in their homes who are unable to use the library.

12) To develop library services as a response to social and economic change.

13) To provide human and material support for community programmes for disadvantaged members of the community.

14) To publicize library services within the community where citizens gather in order to acquaint users and potential users with services offered, introduce new services and maximize the use of available resources.

15) To develop means of publicizing library services in-house by such means as media, posters, signs, displays and programmes.

16) To provide staff assistance in making library resources accessible to all users.

B MATERIALS

Goals:

1) To develop, update and maintain collections which satisfy educational, informational, cultural and leisure needs in the community.

2) To develop collections of materials which reflect the needs of identifiable groups in the community.

3) To organize materials in such a way as to provide the simplest most efficient access to all library materials.

Objectives:

1) To develop current and retrospective collections of materials in both English and French which:

- respond to community demand and social and economic change
- are of long term value
- emphasize continuing development of Canadian studies and Canadian materials
- reflect the multicultural nature of the community
- represent all sides of an issue
- provide an opportunity for personal enrichment
- and/or are complementary to other community resources

2) To select materials without bias toward subject matter, ideology, point of view, format, or ease of storage or handling; based on demand, quality, timeliness or authority.

3) To develop collections which complement and lend support to the educational curriculum but do not necessarily attempt to duplicate the materials recommended.

4) To develop language collections which reflect the multicultural nature of the community.

5) To develop collections of materials in a variety of formats, including print, film, videotape, microform, records, cassettes, computer software, art prints and educational toys.

6) To evaluate collections in all locations on a regular basis to ensure balance, timeliness and responsiveness to need.

7) To evaluate, continuously, new formats and technology to determine whether they complement or expand existing collections.

8) To develop a collection of material on the history of the City of Scarborough.

9) To collect materials appropriate to various age and comprehension levels to meet the needs of the whole community.

10) To acquire materials in a variety of formats specifically for the use of groups such as the disabled.

11) To implement the most efficient means of acquiring and providing access to library materials.

12) To plan and implement the best means of making materials in special formats accessible.

13) To provide bibliographic access where feasible to interlibrary loan networks at the local, national or international level.

14) To provide instruction for the residents by staff to enable full and effective use of the collections and to encourage self-sufficiency in library usage and the widest possible use of available resources.

C HUMAN RESOURCES

Goals:

1) To provide comprehensive, efficient and economic library service through sound management principles and practice.

2) To attract and retain qualified staff in sufficient numbers to achieve objectives.

3) To provide opportunities for staff training and development in order to maximize the quality of service.

Objectives:

1) To provide clearly stated goals and objectives.

2) To provide effective leadership and leadership training to achieve goals and objectives.

3) To encourage participative planning where feasible and to keep staff aware of resulting changes.

4) To communicate to the Municipal and Provincial funding bodies, the public demand for library service in order to achieve reasonable funding levels based on public expectation and use of library services.

5) To organize staff participation in the budgetary planning process, in order to determine community needs and encourage financial accountability throughout the library system.

6) To measure and evaluate, continuously, the effectiveness of all aspects of service.

7) To inform all staff of new policies and services in order to ensure understanding and successful implementation.

8) To employ fully qualified public service oriented staff who will successfully develop, implement and deliver library service for all members of the Scarborough community.

9) To provide through the hiring process, a library staff which reflects the composition of the whole community.

10) To utilize staff effectively according to their qualifications and capabilities so that they can adequately perform designated duties.

11) To evaluate staff requirements on a regular basis to ensure adequate levels to meet service requirements.

12) To provide sufficient support functions necessary for a responsive public library service.

13) To encourage staff understanding of the principles of public library service and the role of the library in the community.

14) To offer orientation and training at time of hiring to provide staff with the information required to understand their role in the system, their specific duties, and to aid them in developing public service skills.

15) To provide opportunity for training when skills require strengthening or upgrading as library services develop or change.

16) To provide staff with the opportunity for professional, supervisory or managerial development by means of in-house training, workshops, continuing education and participation in organizations.

17) To promote awareness amongst all staff of the needs of the various groups served by the library system.

D PHYSICAL FACILITIES

Goals:

1) To provide adequate physical facilities to effectively store, display and circulate materials and to accommodate all elements of an efficient and responsive public library service.

2) To provide physical facilities for users with disabilities or special needs.

3. To create a consultation process with citizens of the community, during the planning and design phase, for public library facilities.

Objectives:

1) To continue to develop a system of integrated service outlets which provide convenient local service and act as access points to the entire Scarborough Public Library system.

2) To plan adequate, flexible physical facilities which will allow for growth and development of service.

3) To locate public service facilities in areas which will facilitate maximum public library usage.

4) To design new facilities and allocate space in existing facilities with optimal functional attractiveness, comfort, and ease of use as criteria.

5) To evaluate, maintain, and upgrade facilities in all branches on a regular basis.

6) To give equal attention to staff and public requirements when designating the use of space.

7) To provide adequate space in all branches which reflects community needs and uses and allows for such functions as children's and teen services, browsing, reading, studying, listening, viewing, displays and exhibits, programming, information service and staff work areas.

8) To provide physical access for the disabled or infirm to all public library buildings.

9) To provide spaces and facilities within branches to make public library services more accessible to the aged, infirm, or disabled, such as shelving of appropriate height in large print and fiction areas, browsing areas with appropriate seating, tables to accommodate wheelchairs, and elevators where appropriate.

APPENDIXES
